

Prof. Memoza Izairi – Republic of Macedonia

Mimoza Izairi is a professor at the “7 Marsi” high school in Tetovo. Professor Mimoza, along with her students, has done a lot of home-based experiments trying to put theories of physical phenomena into a practical aspect. She emphasizes the student’s centric approach during teaching – learning process.

Together with the students they have done different types of experiments that clarify physical occurrences such as motion, magnetic field, and electricity by introducing simple electric circuits, modifications, the way how a neighborhood is supplied with electrical energy, and a lot of other experiments that require a lot of work. She was rewarded for his great experimental work in Bitola - "Bitola Mini Maker Fair".

She continued with her work, and later on took part in fairs from outside Macedonia, in the city of Vushtria in the fair of "Knowledge and Science" where there were participants with their work from cities of Kosovo, Albania and Macedonia. There too her works were praised highly, and the public stood amazed by her work.

As far as the practical aspect is concerned, she managed to take her students to places where the electric power source comes, such as hydroelectric power plants, power plants in different places of Macedonia, where they could see all the process of electricity generation. Her experiment based study encouraged her students to participate in physical competitions held by the DFRM (Association of physicists of the Republic of Macedonia), where they got first places with certificates.

As per her individual data, she has participated in various seminars with different topics, for the creation of her career and work, where we will mention some as:

USAID - Youth educational forum participation in the club “Младите практикуваат владеење на право”(Certificate). USAID - Youth educational forum participation in the club “Обуки за младински активизам”(Certificate), Basic training to strengthen the capacities for the Prevention of Radicalization Leading to Violence, Tetovo 20-22 ,December 2018 (Certificate), Capacity building training from RYCO, Currently Mimoza is in charge of organizing work to form a fair in Tetovo.
