

Amal Aboumouslim

She is a primary teacher in Morocco with 23 years of excellent teaching experience. She is master in Arabic, French and English languages. She is very innovative and dedicated teacher. She was honoured by ministry and her story was recorded and shared with students/teachers and inspectors. She is **country winner** and represented Morocco at the Global Forum of Innovation at Budapest, Hungary. She is using several ICT tools and techniques (Kodu game, mediator) in her classroom. She was active participant in ComPracTICE project. She represented her country in Africa Code Week initiative or hour of code and the Africa Code Week photos.

She is expert in emotional intelligence, mind mapping and Mnemonic Dominic System. She is using image based memory technique in the multiplication table up to 9. In this methodology, she turned pictures into pictures in interesting stories, motivating to learn. She has already started experimenting with her students. The results were very satisfactory and all students were able to memorize the tables. This technique is proving very effective to solve the problem of memorization of tables up to nine. She has been awarded nationally and internationally by various organizations like Google and Microsoft and Ministry of her country for her outstanding and innovative work in education.
