

Dien Nguyen Thi

She studied at HaNoi University and now she is chemistry teacher at high school in Ho Chi Minh City of Viet Nam. She won the **1st Prize** in the creative teachers, competition at national information technology platform in Viet Nam for her project “The Environment without Smoking”. Her name was among the best three teachers of Vietnam attending Global Education Exchange (E2) conference in Paris, France in 2019.

She is the **first ambassador** in Viet Nam about CoSpaces_edu and trained other teachers about CoSpaces_edu in SL_STEM (Service Learning embed in STEM) at Science University in Ho Chi Minh City. She is also ambassador of British Council about STEM. She is innovating and designing a new project with her students: “Applying Microscale in Designing the Active Teaching and STEM”. to teach them how to protect our environment while using chemical substances and integrate it when teaching STEM in classes.
